Result of 2017 Annual General Meeting

KAZ Minerals PLC (the 'Company') announces that at its Annual General Meeting held today, all the resolutions put to shareholders were duly passed on a poll. The poll results showing the number of votes received for and against each resolution are shown below. The poll results represent approximately 56% of the total number of 446,712,943 Ordinary Shares in issue which carry voting rights of one vote per share.

The votes cast on resolutions 4, 7, 9, 10 and 11, relating to the election or re-election of the independent non-executive Directors, have been calculated separately. These resolutions were duly passed by a majority of votes cast by both Independent Shareholders as well as by a majority of votes cast by all Shareholders. The result of the votes cast by the Independent Shareholders (marked with an **) and the votes cast by all Shareholders are set out below.

The Company currently holds 11,666,090 Ordinary Shares in treasury which do not carry voting rights.

Full details of the resolutions passed, together with explanatory notes, are set out in the Notice of Annual General Meeting which is available on the Company's website at www.kazminerals.com.

NOTES TO EDITORS

KAZ Minerals PLC (“KAZ Minerals” or “the Group”) is a high growth copper company focused on large scale, low cost, open pit mining in Kazakhstan. It operates three mines and three concentrators in the East Region of Kazakhstan, the Bozymchak copper-gold mine in Kyrgyzstan, the Bozshakol open pit copper mine in the Pavlodar region of Kazakhstan and the Aktogay open pit copper mine in the East Region of Kazakhstan. In 2016, total copper cathode equivalent output was 140 kt with by-products of 75 kt of zinc in concentrate, 120 koz of gold bar equivalent and 3,103 koz of silver bar equivalent.

The Group’s major growth projects at Bozshakol and Aktogay are expected to deliver one of the highest growth rates in the industry and transform KAZ Minerals into a company dominated by world class, open pit copper mines.

Bozshakol is a first quartile asset on the global cost curve and will have an annual ore processing capacity of 30 million tonnes when fully ramped up, with a mine life of 40 years at a copper grade of 0.36%. The mine and processing facilities will produce 100 kt of copper cathode equivalent and 120 koz of gold in concentrate per year over the first 10 years of operations.

Aktogay is a large scale, open pit mine similar to Bozshakol, with a mine life of more than 50 years and average copper grades of 0.37% (oxide) and 0.33% (sulphide). Aktogay commenced production of copper cathode from oxide ore in December 2015 and copper in concentrate production from sulphide ore commenced in February 2017. The sulphide concentrator will have an annual ore processing capacity of 25 million tonnes when fully ramped up. Aktogay is competitively positioned on the global cost curve and will produce an average of 90 kt of copper cathode equivalent from sulphide ore and 15 kt of copper cathode from oxide ore per year over the first 10 years of operations.

KAZ Minerals is listed on the London Stock Exchange, the Kazakhstan Stock Exchange and the Hong Kong Stock Exchange and employs around 13,000 people, principally in Kazakhstan
